

Gluttony Monster

Concept GDD

- System
- Maps
- Characters
- Assets
- Prototype

Mechanic 1: consuming

Mechanic 2: dialogue

Types of speeches per enemy class:

Human

Critter

Animal

Ancient

Plant

Visualization

You can spam right click to prevent yourself from eating an npc when you have small restraint, kind of immersing the player as the character.

j6v7rtxp6z

Allows people to hunt for broader amount of enemies and to explore the maps.

j6v7rtxp6z

Intellect level up 1

doesn't matter which enemies consumed, the level up will be the same, only different abilities and vanity included.

j6v7rtxp6z

Types of Abilities per enemy class:

Human	human Body, speech tactics for dialogue
Critter/ animal	acid spit, sight, limbs for different types of movement, armor
Ancient	magic spells, more futuristic abilities
Plant	farming, quicker plant growth, special chants for more casual part of gameplay

Mechanic 4: level up

Mechanic 5: Inventory

Inventory 1

OR

Inventory 2

Mechanic 6: Mystery

Mechanic 7: casual part

Vanity is dropped from enemies; crafted; traded

j6v7rtxp6z

Mechanic 8: Gacha

SYSTEM

Economy System

- Flow of resources around system
- managing what people want and don't want (not just supply and demand)

ADDS NEW RESOURCES TO THE ECONOMY

- enemy who drop exp
- a saw mill harvesting wood
- Regen health bar
- sometimes on a timer - automation or mined by the player - manual
- impacts player behavior
- explore - crafting in unique biomes
- aggressive - give health after killing
- enemy up close
- the flow - scarce (thinking)
- abundant (careless)

PERMANENTLY REMOVES RESOURCES FROM ECONOMY

- breakable weapons
- paying taxes
- shooting bullets -> lose them
- forces players to act:
- a.k.a when hungry meter drops, go search for food
- or spoiling crops and you need to navigate the schedule before they disappear
- mixes up strategy + risk adding:

BUYS AND SELLS RESOURCES WITHIN ITS OWN DESIRES

- act like other players
- their own inventory
- resources
- **Buy -> Sell -> Trade**

Based on their own characteristics (supply and demand, animal crossing trade system) where at random days the item value is higher or lower, then depending by expiry date of the item, you can choose to sell low -> and profit or miss opportunity and it goes to waste

- based on what shop, which location
- -> the items you can buy and sell meaning they can buy one thing at one place and sell in another for profit.

HARD LOOP: with every trade they get richer and richer, desaturating gameplay, place a fix to prevent quick amas of wealth (flooding market with one item, quickly makes the price drop and saturate market)

MAPS

Level accessible maps

Level design Small map

NEW

1 human, 0 ancient, 0 animals, 1 plant, 1 critter

Level design Medium map

NEW

5 human, 0 ancient, 1 animals, 5 plant, 3 critter

Human

Gain: Human speech
Human Body

Total needed to consume for
speech proficiency:
50

In game total: Small Map → 1

Medium Map → 5

Large Map first city → 20

Second City → 9

Third City → 1

Total different types of humans:
16

How hard to consume? : 5/10

Critter

Gain: Critter Speech
Critter body

Total needed to consume for
speech proficiency:
100

In game total: Small map → 1

Medium Map → 4

Large Map first city → 10

Second City → 20

Third City → 11

Total different types of critters:
14

How hard to consume? : 4/10

Animal

Gain: Animal Speech
Animal body

Total needed to consume for
speech proficiency:
100

In game total: Medium Map → 1

Large Map first city → 5

Second City → 20

Third City → 10

Total different types of animals:
14

How hard to consume? : 6/10

M A P S

Level design Large map First city

New

1 Ancient, 10 humans, 5 plants, 3 animals, 5 critters

Ancient

Gain: Ancient Speech
Ancient body

Total needed to consume for
speech proficiency:
50

In game total: Medium Map → 0

Large Map first city → 1

Second City → 0

Third City → 19

Total different types of ancient:
20

How hard to consume? : 9/10

Plant

Gain: Plant Speech
Plant body

Total needed to consume for
speech proficiency:
100

In game total: Small map → 1

Medium Map → 10

Large Map first city → 5

Second City → 10

Third City → 20

How hard to consume? : 3/10

Level design Large map Second city

New

1 ancient, 0 humans, 10 animals, 6 critters, 5 plants

Level design Large map Third city

New

18 ancient, 0 humans, 5 animals, 10 critters, 10 plants

PROTOTYPE

joko 3/25/2025 10:40 PM

I have implemented a simple eat mechanic. Right now you eat the enemy, and any attributes that the enemy has, is transferred to the player. Very simple at the moment with health and power as placeholders.

PROTOTYPE

mark their sizes.

Rouke Zang 4/13/2025 1:56 AM

The above are some materials for maps 1 and 2. The size of map 1 is 320×180, the size of mushrooms and stones is 32×32, the size of trees is 64×64, and the size of grassland and land file is 32×32.

This is only a draft of map 1, because we can jigsaw different routes according to our needs

Kate 4/13/2025 12:23 PM

Okay this is getting better, [@joko](#) try the assets in unity please

Kate 4/13/2025 1:31 PM

Also [@Rouke Zang](#) the tiles should be a bit smaller, 16 by 16, can you check the quality of tiles when compressed?

(edited)

We can try both sizes later to see which fits better

Rouke Zang 4/13/2025 2:27 PM

No problem I'll try to change its size later

Kate 4/13/2025 2:33 PM
